High-Performance Foam Sheets

At Foam Villa, we specialize in supplying foam in sheets for B2B & OEM customers, delivering versatile solutions for a wide range of industrial, commercial, and comfort-related applications. With years of experience and a strong global network, we provide high-quality foam sheets directly to your facility, helping streamline production, ensure consistent quality, and meet specific customer requirements.

Complete Foam Sheet Solutions

Our foam sheets are available in a wide range of **thicknesses, sizes, densities (8–120 kg/m³), and colors**. We offer **memory foam, high-resilience, pure, blended, rebounded, and other technical foams**, engineered with precise properties such as **cell structure, hardness, tensile strength, and elongation** to meet specific end-use and application needs.

Foam Villa also develops custom foam solutions tailored to your **comfort, durability, and price requirements**, ensuring products align with both market and end-customer expectations.

Versatile Applications

Our foam sheets serve a wide spectrum of applications, with special emphasis on the comfort and bedding industry

- **Mattresses, pillows, and bedding layers** for homes, hotels, and hospitals
- **Upholstery and furniture cushioning**, including seating and sofas
- **Seating applications** for office chairs, theaters, and automotive interiors
- **Flame lamination, glue lamination, quilting, and other industrial uses**
- **Custom-cut sheets** for specialized manufacturing and packaging needs

These foams help companies **optimize production processes, enhance product comfort, and ensure consistent quality across batches**.

B2B Expertise & Global Delivery

Focused exclusively on B2B customers, Foam Villa combines **technical know-how, quality control, and global sourcing capabilities** to deliver foam sheets efficiently and reliably. From concept to material selection, customization, and delivery, we are your partner in developing **high-performance foam products tailored for comfort, durability, and cost efficiency**.

Foam in Sheets

Discover the adaptability of our Flexible Foam range, available in sheet form and processed through cutting-edge machinery to meet your specific comfort, durability, support, size and shape requirements. These foams undergo meticulous processing using a diverse range of chemicals and additives, ensuring they align perfectly with individual customer needs and end applications.

Flexible polyurethane foam serves as cushioning for an array of consumer and commercial products, including bedding, furniture, automotive interiors, carpet underlay, and packaging. The versatility of flexible foam extends to its ability to take on various shapes and firmness levels. It stands out for being lightweight, durable, supportive, and exceptionally comfortable.

To gauge the quality of our flexible foam, we conduct tests such as tensile strength, tear resistance, and elongation, ensuring that the foam meets the highest standards for performance and durability.

Density: 10 to 150 Kg/m³

Thickness Options: 1.5 mm to 1.5 meters

Foam Feel: Super Soft, Soft, Standard, Hard, Extra Hard

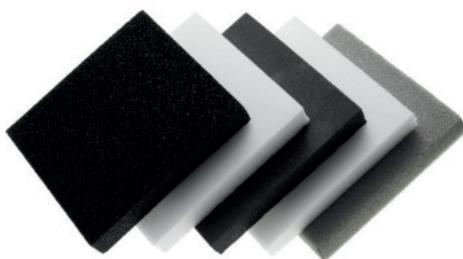

Common Color: White, Grey, Pink, Yellow, Blue, Green and Black

Foam in Sheets

23 DENSITY FOAM

Product Code:- FV-In Sheets- 23

23-density flexible foam is a moderate density foam that offer a balanced combination of comfort and support. It is commonly used in various applications, such as furniture cushions, mattresses, and padding, where flexibility and resilience are desired.

Common Applications: Mattresses and Mattress Toppers, Furniture Cushions, Pillows, Seat Cushions, Packaging.

28 DENSITY FOAM

Product Code:- FV-In Sheets- 28

28 kg/m³ Density foam provides a level of comfort and durability that is synonymous with quality. This option is ideal for individuals who prioritize "Value for Money" as it offers excellent longevity, ensuring a lasting and cost-effective choice.

Common Applications: Mattresses, Pillows, Seat Cushions, Packaging, Upholstery, Soundproofing and Insulation.

32 DENSITY FOAM

Product Code:- FV-In Sheets- 32

Our 32 Density Flexible Foams strike a harmonious balance with a medium density, delivering exceptional foam properties. They stand out as an excellent choice for individuals in search of a combination of quality and affordability in their foam products.

Common Applications: High-End Mattresses, Seat Cushions, Packaging, Upholstery, Orthopedic Supports, Soundproofing and Insulation.

40 DENSITY FOAM

Product Code:- FV-In Sheets- 40

Our 40 Kg/m³ Density open-cell foams are specifically designed to excel in pressure relief, ensuring remarkable longevity, and showcasing superior tensile and resilience properties. These foams stand out for delivering enduring comfort, establishing them as an exceptional choice for various high-end product applications.

Common Applications: High-End Mattresses, Orthopedic Supports, Seat Cushions, Upholstery, Soundproofing and Insulation, padding for exercise equipment, boat cushions, and medical devices.

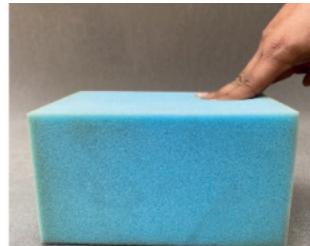

Foam in Sheets

50 DENSITY FOAM

Product Code:- FV-In Sheets- 50

In comfort foam applications, our 50 Kg/m³ Density foams are recognized as high-density foam. Noteworthy for their durability and support, these foams feature an open-cell structure, providing enduring comfort and exceptional load-bearing capacity.

Common Applications: High-End Mattresses, Orthopedic Supports, Seat Cushions & Upholstery.

REBOUNDED FOAM

Product Code:- FV-In Sheets- RF

Introducing our Premium Rebounded Foam, meticulously crafted from shredded foam combined with adhesive to meet the exacting requirements of both customers and industry standards.

Common Applications: Common Applications: Carpet Underlay, Gym and Exercise Mats, Packaging, Acoustic Insulation, Furniture Cushions, Bedding Support, Soundproofing and Insulation.

HIGH RESILIENCE FOAM

Product Code:- FV-In Sheets- HR

Our flexible foam, boasting enhanced resilience reminiscent of natural latex. These foam offer rapid recovery and outstanding bounce-back properties, making it the ideal choice for comfort products where high cushioning and quick bounce back are preferred.

Common Applications: Mattresses and Mattress Toppers, Seat Cushions, Upholstery, Orthopedic Supports, Medical Devices & Exercise Equipment.

COMFORT MEMORY FOAM

Product Code:- FV-In Sheets- Memory

Memory foam, or viscoelastic foam, is a polyurethane foam known for contouring to the body's shape, responding to heat and pressure. Initially developed by NASA for aircraft seats, it's widely used in mattresses, pillows, and medical settings, offering support and comfort by distributing body weight and alleviating pressure points.

Common Applications: Mattresses and Mattress Toppers, Pillows, Seat Cushions, Medical Devices, Footwear, Travel Accessories & Pet Beds.
